

QiS™

QUANTUM INFORMATION SECURITY™

CRYPTO CIRCLE™
100% Blockchain
OS

“Zero Trust Architecture” Solution Description:

This solution was designed and created for the secure environment of an entire operating system. **Crypto Circle™ 100% Blockchain OS** is configurable, manageable, directed, secured with a chain of events, totaling of Random A synchronized Blockchain Keyset, using randomly MD5, SHA256, SHA512, ODS8192V3.4 for a total of 5,131,126 bits of a digital signature system called, Short-Chain v9.01. It also incorporates the next level of blockchain that will help alert if any changes have been made; which is bit-wise. QiS is pleased to announce the ability to confidently secure an operating system. 100% secure.

Crypto Circle™ was designed to be able to deploy on a very small compute-power called a Raspberry Pi Zero, though it works better on the cloud, using AWS, GOOGLE, AZURE. Establishing a Zero Trust Appliance, with ONE intention: remove the need for NDA's in the sales process. Copying and mirroring is human nature and is easy to do. Securing your IP is critical and important for any Inventor or Entrepreneur, QiS will provide confidence your software IP is secure. Designed to support X Windows applications, Web applications, Databases, and the Internet of Things (IoT).

It is safe from the SysAdmin, Manufacture, Operator, Developer, Root, Administrator, Hackers, Malicious users, Insider Threat, Lost, Stolen or Leaked. Zero Permutation Atomic Modality process allows for extremely fast boot times, anti-counterfeit, and is un-fork-able, Immutable but it is a Flexible System. The source code is safe at the vendor, contractor, and client location. Truly the first of its kind. Set and forget it.

Utilization of ODS8192v3.4
Native Encrypted
3 Factor Authentication
3rd Party Exposure Eliminated
Insider Threat Eliminated
Rainbow Table Invulnerable
Keygen and Warez attack Eliminated
Zero CA needed

100% safe from A.I.
100% safe brute force attack
Zero Permutation attack Eliminated
Zero Database to be Hacked
Safe from being leaked, lost, or stolen
Zero Trust encrypted partitions
Constant Monitoring

CRYPTO CIRCLE™
100% Blockchain
OS

Metrics from our Development Team:

Crypto Circle™ Blocked Chain OS The application took 682 hours to write by ZPX 4 engine. 1943 iterations to get to Version 4.x. While directing the ZPX to write out the Bot On Application.

The project was started on 12/18/2018 and it was Completed on 09/24/2019. Total lines of code created from scratch are 150,490; Human readable code deliverable: 257,759, A.I. mirroring: 150,490 lines of code, 100% A.I. Deliverable: 107,269 lines code, with code consolidation: 43,220. The application OS is 100% blockchain, required proof before unlocking access to the OS and continuous operation.

The product is a web-facing application, embedded in an industry-standard Content Management Solution of Joomla, or Drupal. Deployable on Raspberry Pi Zero to the Cloud.

Using the ODS8192v3.4™ framework focused on Polymorphic Digital Signatures™, then using Reversible Atomic Digital Signatures™, with 3rd party signatures as a random mix.

Target Focus, Zero Trust Operating system. Directly design to remove the need for NDA in the sales process; “truly the first of its kind”.
